

# 3 Highline Construction

Category D

**284 McGonagle Road, Selah, WA**

**Main Floor**

Hershel Corbin, II  
509-969-5997

Highline Construction is proud to present this 2,145 square foot, three bedroom, two bathroom, single story home, built on a .80 acre lot in beautiful Selah. This homes high tiled roofline, stamped concrete sidewalks and striking stucco exterior, adds presence to the homes exterior facade. The grand entry is offset and features an arced transom above and two sidelights with quality stamped concrete below. The travertine tiled entry leads you to a quiet living room where a gas fireplace warms those chilly winter evenings. A large four-panel window allows for natural light and a view to the front yard. The formal dining room, just off the entry, is open to the great room. Its dramatic arches and pillars along with the trayed ceiling and indirect lighting set the perfect mood for intimate dining. The great room is the heart of this home and features hand carved wood floors and an extensive sound system. Three large windows and matching transoms allow natural light to flood this warm gathering space. The dining nook, connected directly to the great room and off the kitchen, features access to the rear-covered patio. The open kitchen contains an eating bar with granite counter tops, rustic maple cabinetry with a nutmeg/chocolate glaze and stainless steel appliances. The utility room is just off the kitchen and leads to an oversized three-car garage designed to fit even the largest full size trucks. The two comfortable guest bedrooms are split with the master suite at opposite ends of the home. The master suite is found off the great room and allows for an escape at the end of a busy day. A large walk-in closet and separate linen closet provide ample storage. The master bath features dual sinks, large soaking tub and a luxurious walk-in, dual headed shower. This space is accented with travertine tile, granite counter tops and rustic maple cabinetry.

Highline Construction is owned by Hershel Corbin II and has over 25 years experience in the construction industry. He started his craft with his father as a young boy. In 2001 he started his own company, specializing in custom homes and remodels. Hershel enjoys building a relationship with his clients to help them accomplish their dreams.

Special thanks to Matthew Pistorosi, the homeowner, Patty of Colors by Design who helped with each step of the interior design, and the many sub-contractors who continue to deliver quality products and workmanship to help make others dreams a reality.

**Directions:** Enter Selah and proceed North on 1<sup>st</sup> Street, which will become Selah Loop Rd. Turn left on McGonagle Rd. Turn left onto the first drive and the home will be on your left.
